

In the Claims

Please cancel Claims as 12-14; 15 and 21 without prejudice or disclaimer.

Please add the following Claims:

22. A lateral-view mirror assembly for a vehicle comprising, in combination:

a vehicle;

at least one substantially trapezoidal shaped base portion having a first side dimensioned to be adhered along a length thereof to a side rear side portion of said vehicle spaced from the rear of said vehicle;

at least one lateral-view mirror coupled to a second side of said at least one substantially trapezoidal base portion in a line of sight with a side-view mirror of said vehicle; and

a substantially flat mirror adapted to be coupled to a surface of said side-view mirror of said vehicle and dimensioned to allow a driver to view objects positioned lateral to a rear portion of said vehicle by looking at said substantially flat mirror on said surface of said side-view mirror and seeing a reflection of said objects through said at least one lateral-view mirror.

23. A lateral-view mirror assembly for a vehicle comprising, in combination:

a vehicle;

a first substantially trapezoidal shaped portion having a first side dimensioned to be adhered along a length thereof to a driver's side rear side portion of said vehicle spaced from the rear of said vehicle;

a first lateral-view mirror coupled to a second side of said first substantially trapezoidal shaped base portion in a line of sight with a driver's side side-view mirror of said vehicle;

a second substantially trapezoidal shaped base portion having a first side dimensioned to be adhered along a length thereof to a passenger's side rear side portion of said vehicle spaced from the rear of said vehicle;

C
S
a second lateral-view mirror coupled to a second side of said second substantially trapezoidal shaped base portion in a line of sight with a passenger's side side-view mirror of said vehicle; and

at least one substantially flat side-view mirror adapted to be coupled to a surface of at least one of said driver's side side-view mirror and said passenger's side side-view mirror and dimensioned to allow a driver to view objects positioned lateral to a rear portion of said vehicle by looking at said substantially flat mirror and seeing a reflection of said objects

through at least one of said first lateral-view mirror and said second lateral-view mirror.
